SUMMARY

QA Automation Engineer with 5 years of experience in test automation, API testing, and performance testing across AI-driven agriculture and healthcare products. Built a 300+ test-case Playwright (JavaScript) automation suite from scratch and integrated it into a CI/CD pipeline with Slack reporting, replacing a fully manual regression process. Experienced in JMeter load and performance testing, functional and regression testing, and database/SQL testing within Agile/Scrum teams.

SKILLS

Automation: Playwright (UI & API), Selenium WebDriver, Appium (mobile), Cypress, Cucumber BDD, Page Object Model (POM), JavaScript, Python

AI-Assisted Testing & Workflow Automation: GitHub Copilot, Cursor, and LLMs (ChatGPT/Claude) for test case design, test scenario and edge-case generation, and test script generation and refactoring; n8n for AI-assisted testing workflow automation

API & Performance: Postman API automation, JMeter load & performance testing, API response validation

Testing: Functional, regression, smoke, integration, cross-browser, exploratory, manual, mobile, database/SQL testing, ML/computer-vision output validation

Process & Tools: CI/CD pipelines (Jenkins, GitHub Actions), Git, JIRA, Agile/Scrum, test strategy, defect lifecycle management

EXPERIENCE

Wadhwani AI — QA Automation Engineer II

New Delhi, India | Apr 2023 - Present

Sole QA owner for four AI products across the agriculture and healthcare domains, supporting 5 releases per year on independent release cycles.

Agri AI Collect — field data collection and analytics dashboard platform

- Designed and built a 300+ test-case Playwright (JavaScript) automation suite from scratch covering all dashboard modules, replacing a fully manual regression process.
- Integrated the suite into the CI/CD pipeline using GitHub Actions with Slack run notifications, reducing regression feedback time from 2 days to 45 minutes per build.
- Built REST API automation in Playwright covering all endpoints, validating status codes, response schemas, and error handling alongside UI coverage.
- Use GitHub Copilot and Cursor to generate and refactor Playwright test scripts, and prompt LLMs to draft test scenarios and edge cases, shortening the time to author coverage for new features.
- Maintained test plans, test cases, and execution reports to give full requirement-to-defect traceability across releases.

Crop ACE — image-based crop advisory application

- Ran JMeter load and performance testing at up to 1,000 concurrent users, identifying performance bottlenecks before production release.
- Developed Python scripts to randomise image selection from a source directory, replacing static test data and producing load profiles representative of real field usage.
- Executed regression testing across releases within Agile sprint timelines.

Grain Analyser — computer-vision grain quality grading platform

- Validated image-inference output for accuracy and consistency across varied input conditions, defining pass/fail criteria for non-deterministic model results.
- Developed a mobile automation test suite using Appium covering 62 test cases.
- Performed JMeter load testing and regression testing across releases.
- Wrote complex SQL queries to validate database objects including tables, views, and indexes.
- Contributed to product design reviews, giving input on functional requirements, testability, schedules, and risk.

U6A MNCH — maternal, newborn and child health data platform

- Conducted performance testing to assess application stability under varying load and network conditions.
- Executed smoke, functional, and integration testing, tracking defects to closure in JIRA.

TIBCO Software India Pvt. Ltd. — Associate QA Engineer

Pune, India | Sep 2021 - Apr 2023

Projects: TCLA and BPME

- Developed and maintained automation scripts using a Cucumber BDD framework in Selenium WebDriver, expanding coverage by 200–250 test cases.
- Authored and maintained comprehensive functional and regression test cases, improving release quality across product releases.
- Partnered with developers to reproduce and triage defects, managing the full defect lifecycle in JIRA to drive timely resolution.

IBM Group — Frontend Web Developer Intern

Gurugram, India | Jun 2020 – Sep 2020

- Built and styled responsive web interfaces using HTML, CSS, and JavaScript.

EDUCATION

B.Tech, Computer Science

Dr. Vishwanath Karad MIT World Peace University, Pune | 2017 – 2021 | CGPA: 8.0
